

This is a graded discussion: 10 points possible

due Dec 15

Assignment 9

Are you working on your Senior Project now? If not, what web projects do you plan to do which uses these skills? Do you use Node.js? If not, what is your full stack environment? How do you connect to your DB? What tools do you use to build your service? 2-3 sentences max

I had to update the "suggested due date" (of course lates are acceptable and not penalized) to give time for some other assignments.
